

Uni Upp

Prospectus
2026/27

Visit: www.uniupp.com

The information contained in this prospectus is accurate at the time of publication. It is provided for general guidance to students enrolling with Uni Upp for the 2026/27 academic year and does not constitute part of a contractual agreement. Uni Upp will use all reasonable endeavours to deliver each course of study in line with the descriptions set out in this prospectus for the academic year in which the student commences their programme. However, Uni Upp reserves the right to:

- make reasonable amendments to any course, including (but not limited to) changes to course content, syllabus, individual modules, course location, or methods of delivery;
- withdraw or merge a course with another programme where student numbers are insufficient to ensure viability, or where Uni Upp reasonably deems such action necessary. In the event that a course is discontinued, Uni Upp will use reasonable endeavours to offer affected students a suitable alternative programme.

Uni Upp welcomes feedback and comments on its courses from students' parents and sponsors. However, contracts entered into by Uni Upp are solely with its students and do not confer any rights or benefits on third parties under the Contracts (Rights of Third Parties) Act 1999. A full copy of Uni Upp's terms and conditions is available on our website.

Welcome to Uni Upp

**Imperial College
London**

Dr Salman MBBS, BSc
Senior Academic Consultant

Medical graduate from the second highest ranked university in the world, Imperial College London, and senior academic consultant specialising in widening access to higher education for non-traditional learners.

A Message from Our Senior Academic Consultant.

Throughout my academic and professional career, I have worked with capable individuals who were underestimated by traditional education systems not because of a lack of ability, but because their potential did not fit a narrow academic pathway. Uni Upp was created in response to that reality.

Many of our students come to us having worked for years, supported families, or taken alternative routes after school. They are not behind, they are simply starting from a different place. Uni Upp exists to recognise that difference and support it properly.

Higher education should not be about surviving a system; it should be about developing confidence, competence, and direction. When students are given structure, clarity, and consistent support, progression becomes achievable regardless of background.

At Uni Upp, our role goes far beyond helping students access a course. We guide each learner through the academic process step by step, ensuring they understand what is expected, how to succeed, and where their studies can take them next.

Across the UK, employers are seeking skilled, educated professionals who can think critically and adapt. By aligning our programmes with real industry needs, we help students translate education into opportunity — for themselves, their families, and the communities they are part of.

If you are worried about whether you belong in higher education, or whether you will be supported if challenges arise, know this: Uni Upp is built on the belief that success is not about where you start, but about having the right guidance along the way.

Why Choose Uni Upp?

Uni Upp is designed for students who want clarity, structure, and results not confusion, guesswork, or one-size-fits-all education.

We specialise in supporting working adults, career changers, and students returning to education, many of whom were previously told university was not realistic for them. Our role is to remove barriers, simplify the process, and support you from start to finish.

Flexible Study That Fits Real Life

Most Uni Upp students balance study alongside work, family, and other responsibilities.

Our programmes are therefore delivered with flexibility at their core:

- Morning, evening, and weekend study options
- Multiple intakes throughout the year
- Study patterns designed around working schedules

This means you do not need to put your life on hold to progress — your education fits around it.

World-Class Senior Academic Consultants

From your first conversation, you are supported by experienced academic professionals who understand both higher education systems and real-world career progression.

Your consultant will:

- Help you choose the right course and entry point
- Guide you through applications and assessments
- Support you through key academic milestones

You are never left to “figure it out alone”.

One-to-One Careers Advice Built In

At Uni Upp, employability is not an add-on — it is embedded throughout your journey.

Our Careers & Employability team works with you to:

- Identify realistic career pathways linked to your course
- Prepare professional CVs and applications
- Develop interview confidence and workplace skills

Whether your goal is promotion, career change, or further study, you receive personalised guidance throughout.

Why Choose Uni Upp?

A Learning Environment Built Around Support

Uni Upp is not a single campus — it is a national network.

With access to 27+ partner campuses, you can study close to home while receiving the same high standard of teaching and support.

Across all locations, students benefit from:

- Modern learning spaces and libraries
- Access to PC rooms and study facilities
- Support services available on-site or remotely

Read more about them on page 7.

Proven Outcomes for Real Students

For nearly half a decade, Uni Upp students have delivered satisfaction and progression outcomes that exceed sector averages:

- 30,000+ students assisted
- 97% success rate
- 92% employability rate
- Supporting 1,000+ students per intake
- 4.9-star rating across 525+ Google and Trustpilot reviews
- Extensive testimonials and case studies

These outcomes reflect our focus on completion, progression, and long-term success, not just enrolment.

Awarding Institutions

Campuses

Uni Upp partners with 27+ campuses across the UK, allowing students to study where life already happens — close to home, close to work, and within familiar communities.

For many students, location is not a convenience. It is the difference between starting, continuing, and finishing. That's why Uni Upp focuses on accessible, city-based campuses designed for commuting students and working adults.

Thousands of students study at our partner campuses every year, benefitting from consistent academic standards and structured support wherever they are based.

Why Campus Location Matters

Choosing the right campus can have a direct impact on your success.

Uni Upp partner campuses are selected to:

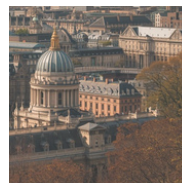

- Reduce long travel times that lead to missed classes
- Support students balancing work, family, and study
- Provide familiar, professional learning environments
- Increase confidence and long-term course completion

Studying closer to home means more time for learning — and less pressure outside it.

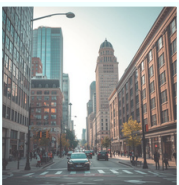

London

Our London partner campuses are based in well-connected areas of the capital, with excellent transport links and access to diverse industries—ideal for students balancing study, work, and life in a global city.

Bradford

Bradford is a city with a proud educational heritage and a strong focus on skills and progression. Our partner campus supports learners across West Yorkshire, offering an accessible & community-focused environment.

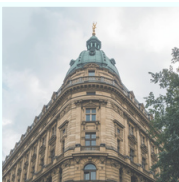

Birmingham

Birmingham campuses are centrally located and easy to access, serving students across the West Midlands. They provide a focused academic environment with strong links to employment and progression opportunities.

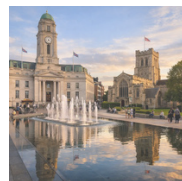

Leeds

Leeds offers a vibrant academic and professional environment. City-centre partner campuses place students in a renowned education hub with excellent transport links and strong industry connections.

Manchester

Manchester thrives on innovation, business, and growth. Uni Upp partner campuses offer modern facilities close to the city centre, ideal for students seeking a dynamic, practical study experience.

Leicester

Leicester offers a welcoming, community-focused place to study. Our partner campus supports a diverse student body, with accessible facilities and support that help students feel confident and succeed

Additional Locations Nationwide

Beyond these cities, Uni Upp works with partner campuses across other UK locations, ensuring students can be matched to the campus that best fits their circumstances.

Our Student Stories

Every Uni Upp student starts with a different story — but they all share one thing: the decision to move forward with the right support in place.

Below are real experiences from students who used Uni Upp to access higher education, build confidence, and take the next step in their journey.

What Our Students Say

My experience with Uni Upp was positive. I received clear guidance and timely support throughout application and enrolment. Everything was explained clearly, questions were answered patiently, and the process felt manageable.

Freddy Mfwende

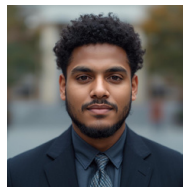

With Uni Upp, I never felt stressed or overwhelmed. Every step was clearly explained and handled professionally, making the process smooth. I felt supported throughout and highly recommend Uni Upp to any university applicant.

Maria Reginah

Uni Upp helped me prepare thoroughly for my university interview, giving clear guidance and boosting my confidence. I went in calm, ready, and well-prepared truly making a difference.

Alesha Barton

Before Uni Upp, I felt lost and hadn't studied in ages. Their step-by-step guidance made preparation clear, boosted my confidence, and now I feel ready for the next step in life.

Dilsson Castro

I applied for my construction management course through Uni Upp and got support at every step. The process was clear, my application succeeded, and I'm ready to enrol. It's never too late!

Mohammad Atiq

Before Uni Upp, I hadn't studied in years and felt lost. Uni Upp guided me step by step, made preparation clear, and boosted my confidence. I now feel ready for the next step.

Robert King

Uni Upp guided me through every step of my application. From personal statement to interview prep, the support was structured, personalised, and made me feel fully prepared.

Hassane Bah

With Uni Upp's support, the application and student finance process was simple. Guidance before my interview perfectly matched the questions, making everything smooth and boosting my confidence.

Songa Begum

Outcomes That Reflect Real Progress

Behind every story is a structured system designed to help students start, continue, and complete their studies.

- 30,000+ students assisted
- 97% success rate
- 92% employability rate

Choosing the Right Course

Selecting the right course is about more than subject choice.

Uni Upp supports you to consider:

- Your current experience and qualifications
- Your long-term career goals
- The study format that fits your life
- The most suitable campus and awarding institution

Our academic consultants work with you one-to-one to ensure you start on the right path.

CertHE Business Management

The CertHE Business Management programme is designed for students who want an introduction to higher education and business studies.

This course helps students build academic confidence while developing essential business knowledge and transferable skills. It provides a strong foundation for further study or entry-level roles in business environments.

This course is ideal if you:

- Want a short, flexible introduction to university-level study
- Are unsure about committing to a full degree initially
- Want to build confidence and academic skills
- Are planning to progress to a business degree

Year 1

- Introduction to Business Management
- Business Communication Skills
- Marketing Basics
- Academic and Professional Development

Graduates of this programme progress into roles such as:

- Administrative Assistant
- Customer Service Coordinator
- Junior Business Support Roles

Many students progress into Year 1 of a related business degree after successful completion.

Key Information

- Intakes: Apr, Aug, Nov (subject to availability)
- Duration: 1 year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

HND Business

The HND in Business programme is designed for students who want a practical and accessible route into higher education and business-related careers.

This course provides a strong foundation in core business principles, preparing students for employment or progression to a full honours degree. Students develop practical skills in management, communication, and problem-solving within a business context.

This course is ideal if you:

- Want to enter higher education without traditional qualifications
- Are returning to education and want a practical business course
- Want a pathway into the final year of a business degree
- Are aiming to progress into junior business or administrative roles

Year 1

- Business Environment
- Principles of Management
- Marketing Essentials
- Professional Development Skills

Year 2

- Managing Business Operations
- Human Resource Management
- Business Finance
- Business Research Project

Graduates of this programme progress into roles such as:

- Business Administrator
- Operations Assistant
- Junior Manager
- Office or Team Coordinator

Many students progress directly into Year 3 (Top-Up) of a related business degree.

Key Information

- Intakes: Jan, Jun, Sept (subject to availability)

- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

HND Construction Management

The HND in Construction Management programme is designed for students who want a practical and industry-focused route into construction management.

This course provides a strong foundation in construction principles, site operations, and project delivery. Students develop skills that support employment or progression into the final year of a construction-related degree.

This course is ideal if you:

- Want to enter higher education without traditional qualifications
- Are working in construction and want formal progression
- Want a practical pathway into construction management
- Are aiming to progress to a degree top-up

Year 1

- Construction Technology
- Health, Safety and Welfare
- Construction Mathematics
- Professional Development

Year 2

- Construction Project Management
- Contract Administration
- Cost Management
- Construction Research Project

Graduates of this programme progress into roles such as:

- Assistant Site Manager
- Construction Supervisor
- Project Support Assistant
- Site Coordinator

Many students progress directly into Year 3 (Top-Up) of a related construction management degree.

Key Information

- Intakes: Jan, Jun, Sept (subject to availability)

HND Digital Technologies (Cyber Security)

The HND in Digital Technologies (Cyber Security) programme is designed for students who want a practical route into cyber security and digital technology careers.

This course provides industry-relevant skills in cyber security, networking, and digital systems. Students develop hands-on technical knowledge and can progress into employment or a degree top-up programme.

This course is ideal if you:

- Want an applied and practical cyber security qualification
- Are entering higher education without traditional qualifications
- Want a pathway into a full computing or cyber security degree
- Are aiming for technical or support roles in IT security

Year 1

- Digital Technologies
- Networking Fundamentals
- Cyber Security Principles
- Professional Development Skills

Year 2

- Cyber Security Operations
- Threat Analysis and Protection
- Secure Network Design
- Applied Digital Technologies Project

Graduates of this programme progress into roles such as:

- IT Support Technician
- Cyber Security Support Analyst
- Network Support Assistant
- Digital Systems Technician

Many students progress into Year 3 (Top-Up) of a related computing or cyber security degree.

Key Information

- Intakes: Jan, Jun, Sept (subject to availability)

- Marketing for Hospitality and Events
- Business Research Methods

Year 3

- Strategic Hospitality and Events Management
- Managing Customer Experience
- Leadership in Service Organisations
- Dissertation or Applied Business Project

Graduates of this programme progress into roles such as:

- Hospitality Operations Manager
- Events Coordinator or Manager
- Venue or Conference Manager
- Customer Experience Manager
- Management Trainee

Many graduates also progress into postgraduate hospitality or business programmes.

Key Information

- Intakes: Jan, May, Sept (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

BSc Business and Law

The BSc (Hons) Business and Law programme is designed for students who want to develop an understanding of both business management and legal principles.

This course combines core business knowledge with key areas of law relevant to commercial and organisational contexts. Students gain practical skills in analysis, decision-making, and understanding legal frameworks that affect businesses.

This course is ideal if you:

- Are interested in business and legal studies
- Want to work in commercial, compliance, or administrative roles
- Are considering future legal or business careers
- Want a degree that combines law with business practice

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Business and Law
- Mathematics and Data Skills for Business
- Digital Literacy and Professional Communication

Year 1

- Business Environment
- Principles of Management
- Introduction to Law
- Professional and Academic Development

Year 2

- Contract Law
- Business Law
- Human Resource Management
- Business Research Methods

Year 3

- Commercial Law
- Corporate Governance
- Strategic Management
- Dissertation or Applied Business Project

Graduates of this programme progress into roles such as:

- Compliance Assistant
- Business or Legal Administrator
- Contracts Officer
- Management Trainee
- Commercial Operations Assistant

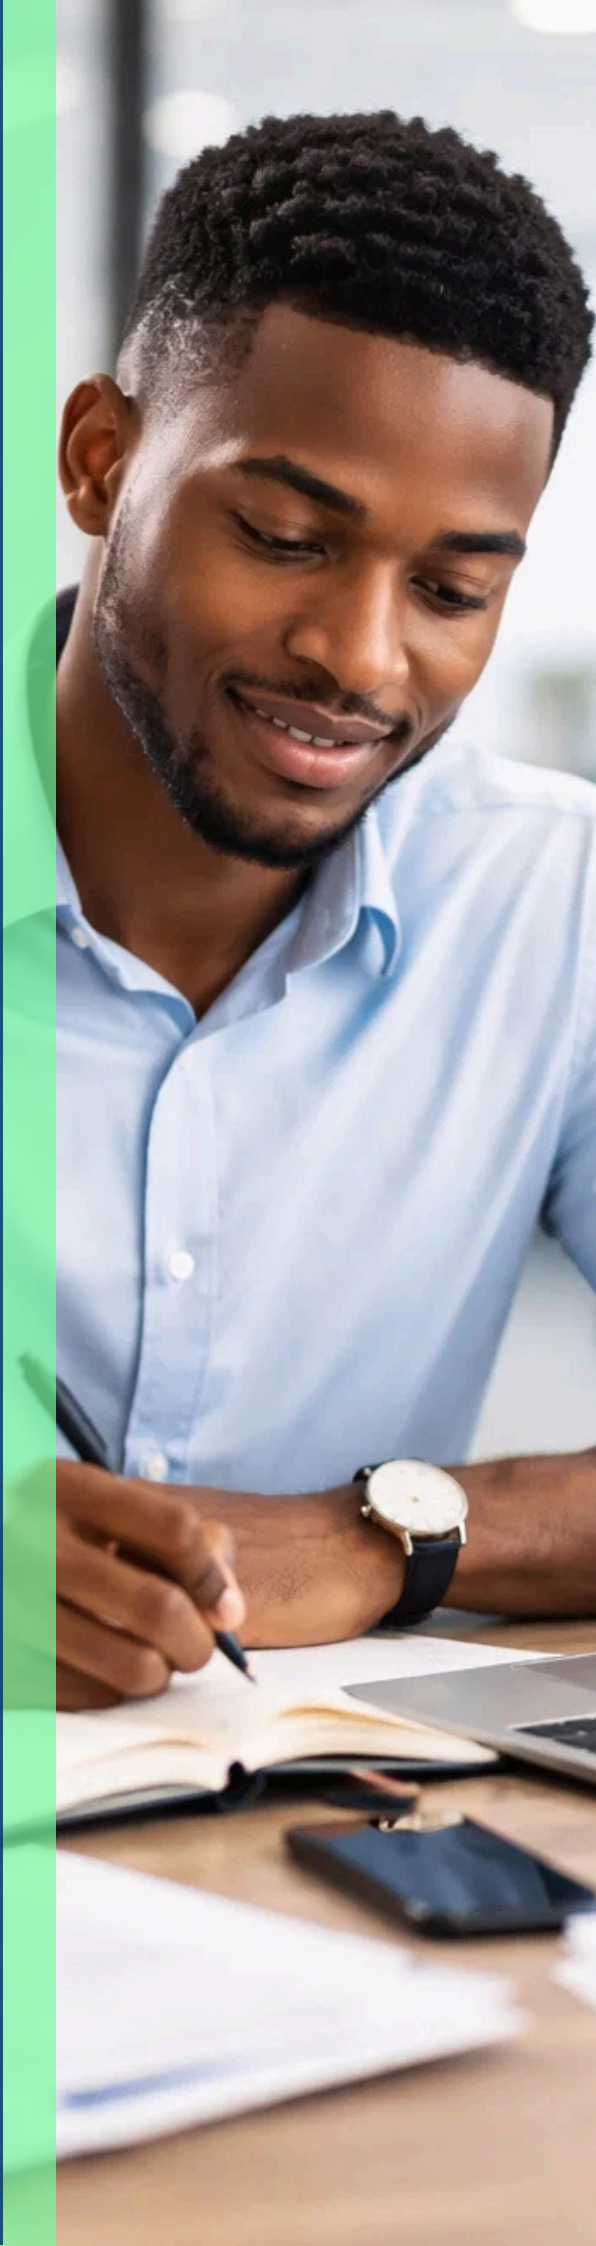

Many graduates also progress into postgraduate business or law-related programmes.

Key Information

- Intakes: Jan, May, Sept (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Business and Marketing

The BSc (Hons) Business and Marketing programme is designed for students who want to build careers in marketing, communications, and commercial strategy.

This course combines core business management knowledge with modern marketing theory and practice. Students develop practical skills in branding, digital marketing, consumer behaviour, and market analysis.

This course is ideal if you:

- Are interested in marketing, branding, or communications
- Want to work in marketing or commercial roles
- Are returning to education and want a business-focused degree
- Want progression into specialist or management roles

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Business and Marketing
- Mathematics and Data Skills for Business
- Digital Literacy and Professional Communication

Year 1

- Business Environment
- Principles of Management
- Marketing Fundamentals
- Professional and Academic Development

Year 2

- Consumer Behaviour
- Digital Marketing
- Marketing Research
- Business Research Methods

Year 3

- Strategic Marketing
- Brand Management
- Integrated Marketing Communications
- Dissertation or Applied Business Project

Graduates of this programme progress into roles such as:

- Marketing Assistant or Executive
- Digital Marketing Coordinator
- Brand or Communications Assistant
- Market Research Assistant
- Management Trainee

Many graduates also progress into postgraduate marketing or business programmes.

Key Information

- Intakes: Jan, May, Sept (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Construction Management

The BSc Construction Management programme is designed for students who want to build professional careers within the construction and built environment sector.

This course develops a strong understanding of construction processes, project delivery, and site management. Students gain practical knowledge in planning, cost control, health and safety, and managing construction projects from start to completion.

This course is ideal if you:

- Want to work in construction or site management roles
- Are already working in construction and want to progress
- Want a practical degree aligned with industry needs
- Are aiming for supervisory or management positions

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Construction and the Built Environment
- Mathematics and Measurement for Construction
- Digital Literacy and Professional Communication

Year 1

- Construction Technology
- Construction Health and Safety
- Principles of Management
- Professional and Academic Development

Year 2

- Construction Project Management
- Construction Law and Contracts
- Cost Planning and Control
- Business Research Methods

Year 3

- Strategic Construction Management
- Commercial Management in Construction
- Risk and Quality Management
- Dissertation or Applied Construction Project

Graduates of this programme progress into roles such as:

- Site Supervisor or Site Manager
- Assistant Project Manager
- Construction Coordinator
- Quantity Surveying Assistant
- Management Trainee

Many graduates also progress into postgraduate construction or project management programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Project Management

The BSc Project Management programme is designed for students who want to develop skills in planning, delivering, and managing projects across a range of industries.

This course focuses on core project management principles, leadership, and operational delivery. Students gain practical skills in scheduling, budgeting, risk management, and stakeholder communication.

This course is ideal if you:

- Want to work in project or operations roles
- Are interested in managing teams, timelines, and resources
- Want a degree applicable across multiple industries
- Are planning progression into management positions

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Project Management
- Mathematics and Data Skills
- Digital Literacy and Professional Communication

Year 1

- Principles of Project Management
- Business Environment
- Introduction to Operations Management
- Professional and Academic Development

Year 2

- Project Planning and Control
- Risk and Quality Management
- Managing Project Teams
- Business Research Methods

Year 3

- Strategic Project Management
- Programme and Portfolio Management
- Leadership and Change
- Dissertation or Applied Project Management Project

Graduates of this programme progress into roles such as:

- Project Coordinator
- Assistant Project Manager
- Operations Coordinator
- Project Support Officer
- Management Trainee

Many graduates also progress into postgraduate project management programmes.

Key Information

- Intakes: Jan, May, Sept (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Computing

The BSc Computing programme is designed for students who want to build careers in information technology, computing, and digital systems.

This course provides a strong foundation in computing principles, programming, systems development, and problem-solving. Students develop practical technical skills alongside analytical and professional competencies required in modern IT environments.

This course is ideal if you:

- Want to work in IT or computing-related roles
- Are interested in software, systems, and digital technologies
- Are returning to education and want a flexible computing degree
- Want progression into specialist or postgraduate computing roles

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Computing
- Mathematics for Computing
- Digital Literacy and Professional Communication

Year 1

- Computer Systems
- Programming Fundamentals
- Database Concepts
- Professional and Academic Development

Year 2

- Software Development
- Web Technologies
- Networks and Security
- Business Research Methods

Year 3

- Advanced Software Development
- Emerging Technologies
- Systems Analysis and Design
- Dissertation or Applied Computing Project

Graduates of this programme progress into roles such as:

- IT Support Analyst
- Junior Software Developer
- Systems Administrator
- Technical Support Specialist

Many graduates also progress into postgraduate computing or technology programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Computing Systems

The BSc Computing Systems programme is designed for students who want to specialise in the design, development, and management of computing systems.

This course focuses on hardware, software, and networked systems. Students develop skills in system architecture, programming, and infrastructure management aligned with industry requirements.

This course is ideal if you:

- Are interested in computing systems and infrastructure
- Want to work in technical or systems-focused roles
- Want a degree with practical and technical depth
- Are planning progression into advanced computing roles

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Computing Systems
- Mathematics for Computing
- Digital Literacy and Professional Communication

Year 1

- Computer Architecture
- Programming Fundamentals
- Operating Systems
- Professional and Academic Development

Year 2

- Network Systems
- Database Management Systems
- Web and Application Development
- Business Research Methods

Year 3

- Distributed Systems
- Systems Security
- Advanced Computing Systems
- Dissertation or Applied Systems Project

Graduates of this programme progress into roles such as:

- Systems Analyst
- Network Administrator
- Infrastructure Engineer (Junior)
- IT Support Specialist

Many graduates also progress into postgraduate computing programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Computing with Technology

The BSc Computing with Technology programme is designed for students who want to develop practical computing skills with a strong focus on modern technologies.

This course combines core computing knowledge with applied technology skills, preparing students for roles across IT, software, and digital environments.

This course is ideal if you:

- Want hands-on experience with computing technologies
- Are interested in applied IT and software systems
- Want a practical and flexible computing degree
- Are planning progression into technical roles

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Computing and Technology
- Mathematics for Computing
- Digital Literacy and Professional Communication

Year 1

- Programming Fundamentals
- Computer Systems
- Technology in Organisations
- Professional and Academic Development

Year 2

- Applied Software Development
- Web Technologies
- Data Management
- Business Research Methods

Year 3

- Advanced Computing Technologies
- Systems Integration
- Emerging Digital Technologies
- Dissertation or Applied Technology Project

Graduates of this programme progress into roles such as:

- IT Technician
- Junior Software Developer
- Technical Support Analyst
- Digital Systems Assistant

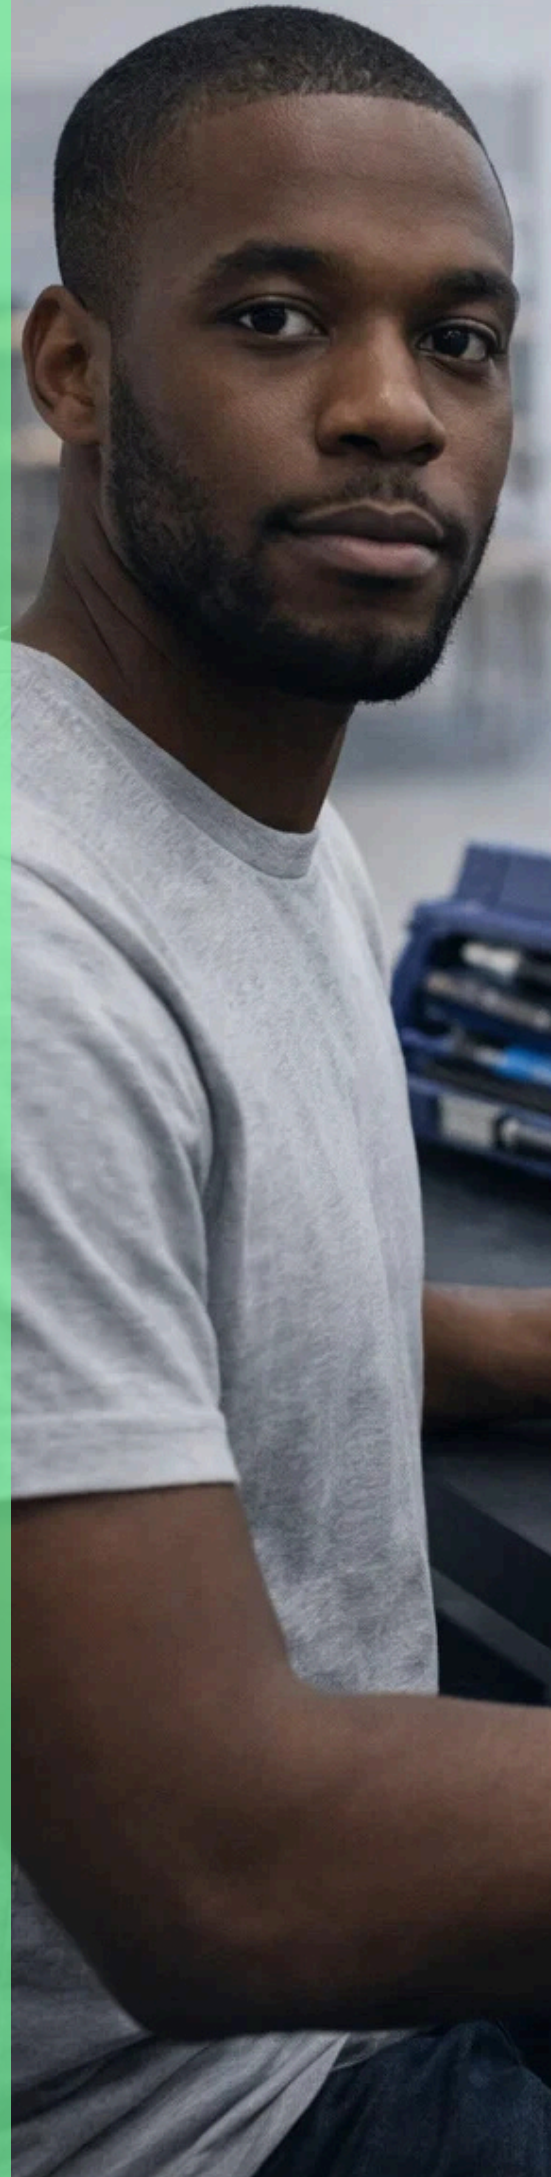

Many graduates progress into postgraduate computing programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Computing with Information Security Management

The BSc Computing with Information Security Management programme is designed for students who want to build careers in secure systems, information governance, and technology management.

This course combines core computing knowledge with a strong focus on information security, risk management, and organisational protection. Students develop practical skills in safeguarding systems, data, and digital infrastructure.

This course is ideal if you:

- Are interested in information security and systems protection
- Want to work in IT governance or security-related roles
- Want a computing degree with a security and management focus
- Are planning progression into cyber or security careers

Year 1

- Computer Systems
- Programming Fundamentals
- Introduction to Information Security
- Professional and Academic Development

Year 2

- Network Security
- Information Risk Management
- Database Systems
- Business Research Methods

Year 3

- Information Security Management
- Cyber Law and Ethics
- Secure Systems Design
- Dissertation or Applied Security Project

Graduates of this programme progress into roles such as:

- Information Security Analyst (Junior)
- IT Security Coordinator
- Systems Support Analyst
- Risk and Compliance Assistant

Many graduates progress into postgraduate cyber security or technology programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Computing with Data Science and Big Data Technology

The BSc Computing with Data Science and Big Data Technology programme is designed for students who want to work with large-scale data, analytics, and data-driven technologies.

This course develops computing skills alongside data analysis, statistical methods, and big data technologies. Students learn how data is collected, processed, analysed, and used to support decision-making.

This course is ideal if you:

- Are interested in data, analytics, and problem-solving
- Want to work in data-driven or analytical roles
- Want a computing degree with strong technical focus
- Are planning progression into data science careers

Year 1

- Programming Fundamentals
- Database Concepts
- Computer Systems
- Professional and Academic Development

Year 2

- Data Analytics
- Big Data Technologies
- Data Management Systems
- Business Research Methods

Year 3

- Advanced Data Science
- Machine Learning Fundamentals
- Data Visualisation
- Dissertation or Applied Data Project

Graduates of this programme progress into roles such as:

- Data Analyst (Junior)
- Business Intelligence Assistant
- Data Support Analyst
- Technical Data Coordinator

Many graduates progress into postgraduate data science or analytics programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Computing with Cyber Security Technology

The BSc Computing with Cyber Security Technology programme is designed for students who want to build technical careers in cyber security and digital defence.

This course focuses on protecting systems, networks, and data from cyber threats. Students develop hands-on technical skills in security technologies, threat analysis, and system protection.

This course is ideal if you:

- Are interested in cyber security and digital protection
- Want to work in security-focused technical roles
- Want a computing degree with applied cyber focus
- Are planning progression into cyber security careers

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Computing and Cyber Security
- Mathematics for Computing
- Digital Literacy and Professional Communication

Year 1

- Programming Fundamentals
- Computer Systems
- Introduction to Cyber Security
- Professional and Academic Development

Year 2

- Network Security
- Ethical Hacking Fundamentals
- Operating Systems Security
- Business Research Methods

Year 3

- Advanced Cyber Security
- Digital Forensics
- Secure Network Design
- Dissertation or Applied Cyber Project

Graduates of this programme progress into roles such as:

- Cyber Security Analyst (Junior)
- Security Operations Assistant
- Network Security Technician
- IT Security Support Officer

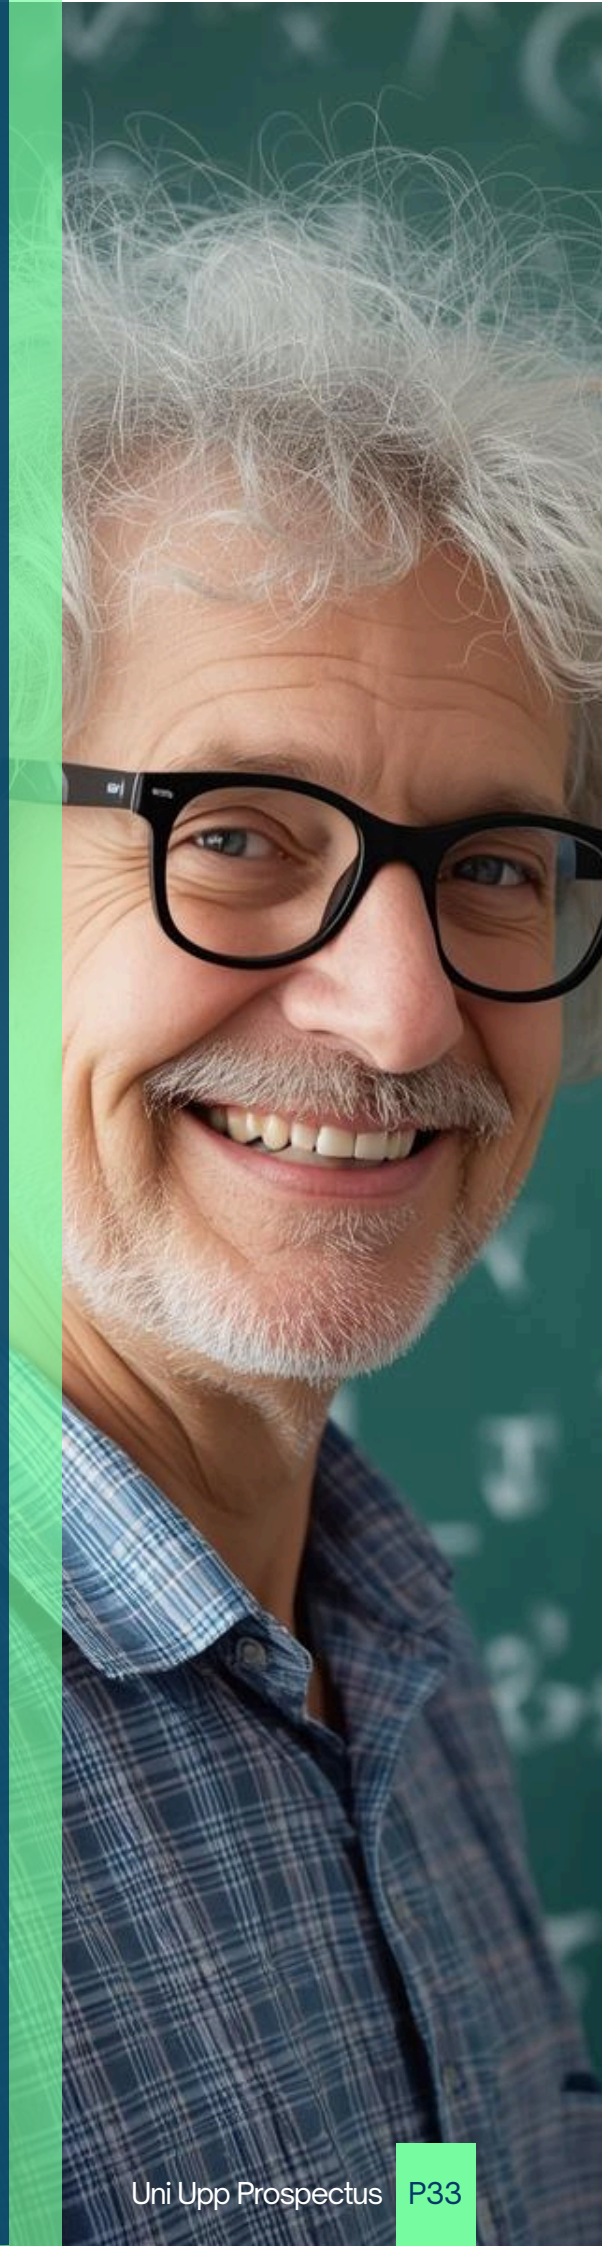

Many graduates progress into postgraduate cyber security programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Computing with Artificial Intelligence Technology

The BSc Computing with Artificial Intelligence Technology programme is designed for students who want to work with intelligent systems, automation, and emerging AI technologies.

This course develops core computing skills alongside artificial intelligence concepts such as machine learning, intelligent systems, and data-driven automation.

This course is ideal if you:

- Are interested in artificial intelligence and emerging technologies
- Want to work in innovative or technical computing roles
- Want a future-focused computing degree
- Are planning progression into AI or data-driven careers

Year 1

- Programming Fundamentals
- Computer Systems
- Introduction to Artificial Intelligence
- Professional and Academic Development

Year 2

- Machine Learning
- Data Structures and Algorithms
- Intelligent Systems
- Business Research Methods

Year 3

- Advanced Artificial Intelligence
- Neural Networks
- Applied AI Technologies
- Dissertation or Applied AI Project

Graduates of this programme progress into roles such as:

- AI Support Engineer
- Machine Learning Assistant
- Software Developer (AI Focus)
- Data or Systems Analyst

Many graduates progress into postgraduate AI or computer science programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Data Science

The BSc Data Science programme is designed for students who want to build careers in data analysis, analytics, and data-driven decision-making.

This course combines computing, statistics, and data technologies to develop skills in analysing, interpreting, and presenting data. Students gain practical experience in data handling, modelling, and visualisation across business and technical contexts.

This course is ideal if you:

- Are interested in data, analytics, and problem-solving
- Want to work in data-driven roles across industries
- Want a technical degree with strong analytical focus
- Are planning progression into data science or analytics careers

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Data Science
- Mathematics for Computing
- Digital Literacy and Professional Communication

Year 1

- Programming Fundamentals
- Database Systems
- Statistics for Data Science
- Professional and Academic Development

Year 2

- Data Analytics
- Data Mining
- Big Data Technologies
- Business Research Methods

Year 3

- Advanced Data Science
- Machine Learning Applications
- Data Visualisation
- Dissertation or Applied Data Project

Graduates of this programme progress into roles such as:

- Data Analyst (Junior)
- Business Intelligence Analyst
- Data Support Specialist
- Analytics Assistant

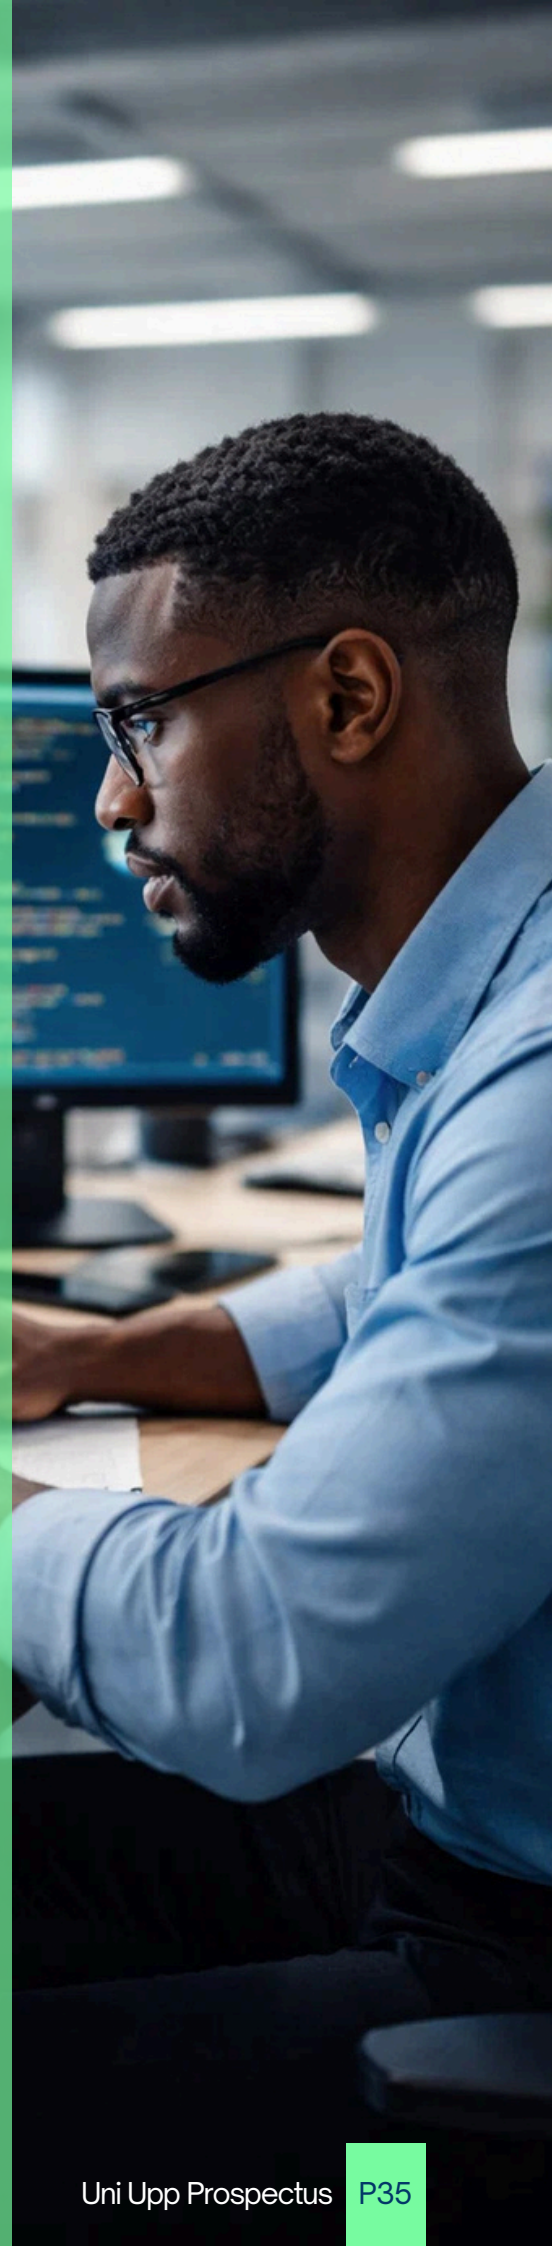

Many graduates progress into postgraduate data science or analytics programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

Visit our website at www.uniupp.com

BSc Digital Marketing and Management

The BSc Digital Marketing and Management programme is designed for students who want to build careers in digital marketing, communications, and business management.

This course combines core business management knowledge with digital marketing strategy, analytics, and online communication. Students develop practical skills aligned with modern digital and commercial environments.

This course is ideal if you:

- Are interested in digital marketing and online strategy
- Want to work in marketing or business roles
- Want a degree combining marketing with management
- Are planning progression into specialist or leadership positions

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Digital Marketing
- Mathematics and Data Skills
- Digital Literacy and Professional Communication

Year 1

- Principles of Marketing
- Business Environment
- Digital Media Fundamentals
- Professional and Academic Development

Year 2

- Digital Marketing Strategy
- Consumer Behaviour
- Marketing Analytics
- Business Research Methods

Year 3

- Strategic Digital Marketing
- Brand Management
- Integrated Marketing Communications
- Dissertation or Applied Marketing Project

Graduates of this programme progress into roles such as:

- Digital Marketing Executive
- Marketing Assistant
- Content or Social Media Coordinator
- Brand or Communications Assistant

Many graduates progress into postgraduate marketing or business programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

BSc Cyber Security

The BSc Cyber Security programme is designed for students who want to develop technical skills in protecting digital systems and information.

This course focuses on cyber security principles, network protection, threat analysis, and secure systems. Students gain practical and theoretical skills required to support cyber defence in modern organisations.

This course is ideal if you:

- Are interested in cyber security and system protection
- Want to work in security or IT support roles
- Want a technical computing degree with security focus
- Are planning progression into cyber security careers

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Cyber Security
- Mathematics for Computing
- Digital Literacy and Professional Communication

Year 1

- Computer Systems
- Programming Fundamentals
- Cyber Security Fundamentals
- Professional and Academic Development

Year 2

- Network Security
- Ethical Hacking
- Operating Systems Security
- Business Research Methods

Year 3

- Advanced Cyber Security
- Digital Forensics
- Secure Systems Design
- Dissertation or Applied Cyber Project

Graduates of this programme progress into roles such as:

- Cyber Security Analyst (Junior)
- IT Security Support Officer
- Security Operations Assistant
- Network Security Technician

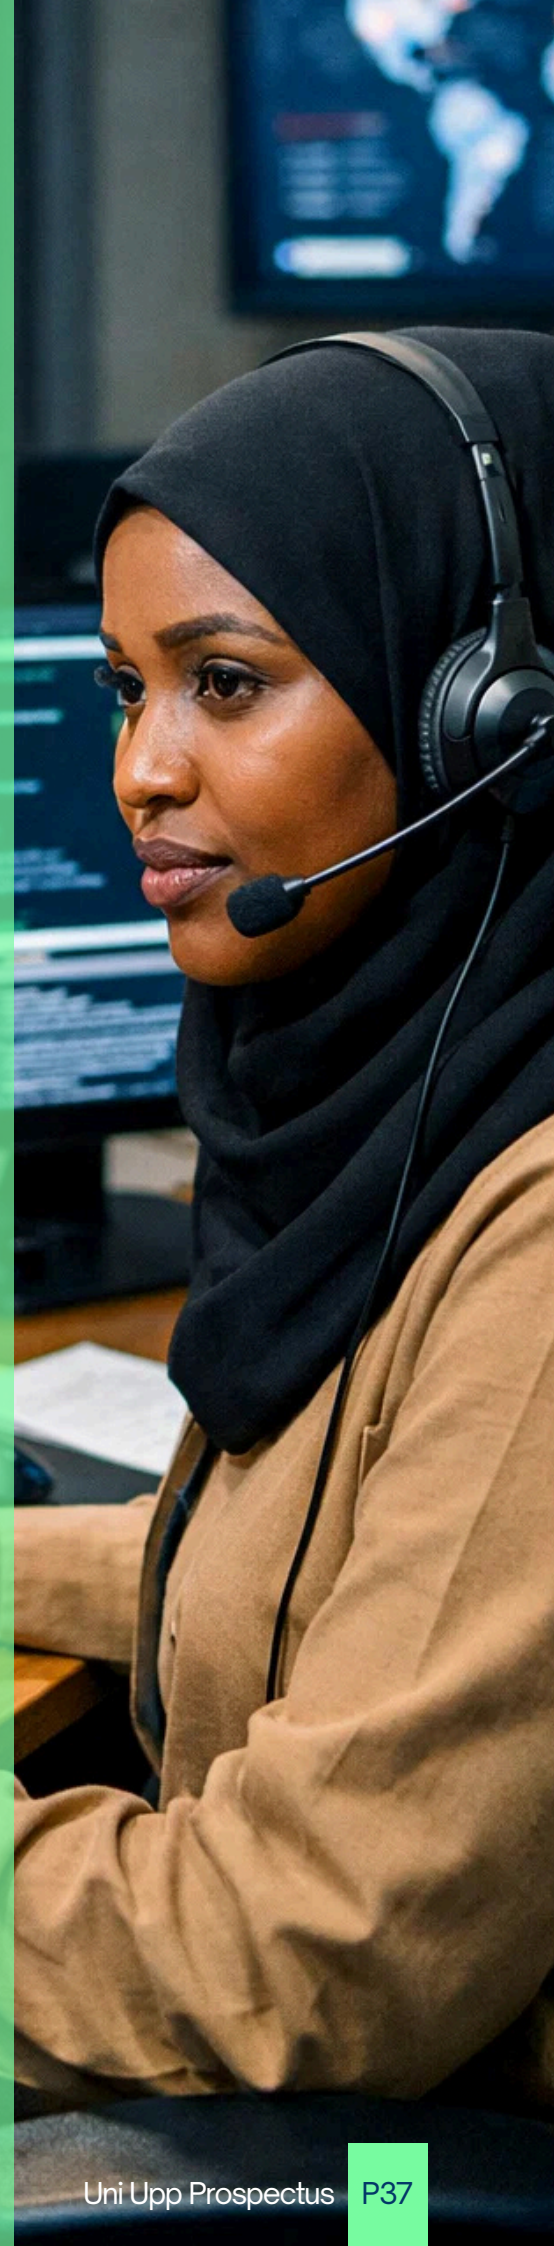

Many graduates progress into postgraduate cyber security programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

LLB Law

The LLB Law programme is designed for students who want to develop a strong understanding of legal principles and the legal system.

This course provides a foundation in core areas of law, legal reasoning, and analytical skills. Students develop the ability to interpret legislation, analyse cases, and apply legal knowledge in academic and professional contexts.

This course is ideal if you:

- Are interested in law and legal studies
- Want to pursue legal, compliance, or professional careers
- Are considering postgraduate legal study
- Want strong analytical and critical thinking skills

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Law
- Legal Research and Writing
- Digital Literacy and Professional Communication

Year 1

- Public Law
- Contract Law
- Legal Methods
- Professional and Academic Development

Year 2

- Tort Law
- Criminal Law
- Land Law
- Business Research Methods

Year 3

- Equity and Trusts
- Commercial Law
- Jurisprudence
- Dissertation or Applied Legal Project

Graduates of this programme progress into roles such as:

- Legal Assistant
- Paralegal
- Compliance Officer
- Legal Administrator

Many graduates also progress into postgraduate legal study or professional training.

Key Information

- Intakes: Jan, May, Sept (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

BSc Finance & Accounting

The BSc Finance & Accounting programme is designed for students who want to build careers in finance, accounting, and financial management.

This course develops knowledge of financial reporting, accounting principles, and business finance. Students gain practical skills in financial analysis, budgeting, and decision-making within organisational contexts.

This course is ideal if you:

- Are interested in finance and accounting careers
- Want to work in financial or commercial roles
- Are returning to education and want a structured finance degree
- Want progression into professional or postgraduate study

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Business and Finance
- Mathematics and Data Skills
- Digital Literacy and Professional Communication

Year 1

- Financial Accounting
- Business Environment
- Principles of Management
- Professional and Academic Development

Year 2

- Management Accounting
- Corporate Finance
- Business Economics
- Business Research Methods

Year 3

- Financial Reporting
- Strategic Financial Management
- Auditing and Assurance
- Dissertation or Applied Finance Project

Graduates of this programme progress into roles such as:

- Finance Assistant
- Accounts Officer
- Junior Accountant
- Business Analyst (Junior)

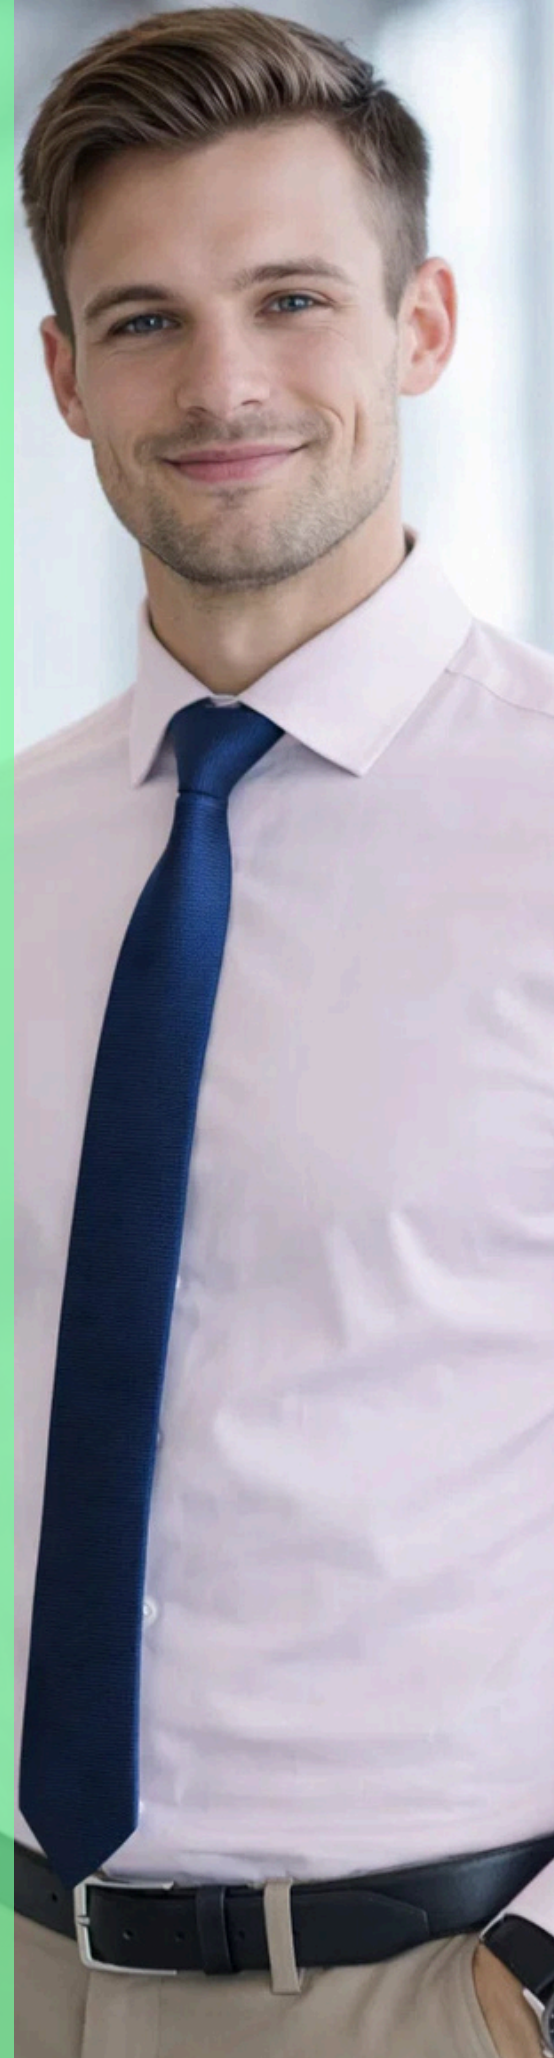

Many graduates progress into postgraduate finance, accounting, or professional qualifications.

Key Information

- Intakes: Jan, Feb, May, Jun, Sept, Oct (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

BSc

Accounting with Management

The BSc Accounting with Management programme is designed for students who want to combine accounting knowledge with business and management skills.

This course develops an understanding of financial accounting alongside organisational management and decision-making. Students gain practical skills suited to accounting, management, and commercial roles.

This course is ideal if you:

- Are interested in accounting and business management
- Want to work in finance-related or managerial roles
- Want a degree combining accounting with leadership skills
- Are planning progression into management or postgraduate study

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Accounting and Management
- Mathematics and Data Skills
- Digital Literacy and Professional Communication

Year 1

- Financial Accounting
- Principles of Management
- Business Environment
- Professional and Academic Development

Year 2

- Management Accounting
- Business Finance
- Human Resource Management
- Business Research Methods

Year 3

- Strategic Management Accounting
- Corporate Governance
- Financial Decision Making
- Dissertation or Applied Accounting Project

Graduates of this programme progress into roles such as:

- Accounts Assistant
- Finance or Management Trainee
- Business Support Analyst
- Accounting Technician

Many graduates progress into postgraduate accounting or management programmes.

Key Information

- Intakes: Jan, May, Sept (subject to availability)

BSc

Health and Social Care

The BSc Health and Social Care programme is designed for students who want to build careers within health, care, and support services.

This course develops an understanding of health and social care systems, service delivery, and professional practice. Students gain knowledge and skills to support individuals, families, and communities across care settings.

This course is ideal if you:

- Want to work in health or social care services
- Are currently working in care and want to progress
- Want a degree leading to management or professional roles
- Are planning further study or career development

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Health and Social Care
- Study Skills and Communication
- Digital Literacy and Professional Communication

Year 1

- Health and Social Care Practice
- Human Growth and Development
- Equality, Diversity and Inclusion
- Professional and Academic Development

Year 2

- Safeguarding and Risk Management
- Health Policy and Practice
- Working with Service Users
- Business Research Methods

Year 3

- Integrated Health and Social Care
- Leadership and Management in Care
- Contemporary Issues in Health
- Dissertation or Applied Care Project

Graduates of this programme progress into roles such as:

- Care Coordinator
- Support Worker
- Health or Social Care Officer
- Assistant Manager

Many graduates progress into postgraduate health or social care programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

BSc Health, Wellbeing and Social Care

The BSc Health, Wellbeing and Social Care programme is designed for students who want to promote health, wellbeing, and quality of life across communities.

This course focuses on wellbeing, prevention, and social care practice. Students develop knowledge and skills to support individuals and communities through health promotion and care initiatives.

This course is ideal if you:

- Are interested in wellbeing and preventative care
- Want to work in community or support roles
- Want a holistic health and social care degree
- Are planning careers in wellbeing services

Foundation Year

(For students without traditional entry qualifications or returning to study)

- Academic Skills for Higher Education
- Introduction to Health and Wellbeing
- Study Skills and Communication
- Digital Literacy and Professional Communication

Year 1

- Foundations of Wellbeing
- Health and Social Care Practice
- Equality and Inclusion
- Professional and Academic Development

Year 2

- Mental and Physical Wellbeing
- Community Health Approaches
- Health Promotion
- Business Research Methods

Year 3

- Wellbeing Across the Lifespan
- Managing Health and Care Services
- Contemporary Health Challenges
- Dissertation or Applied Wellbeing Project

Graduates of this programme progress into roles such as:

- Wellbeing Coordinator
- Community Support Officer
- Health Improvement Assistant
- Care Services Administrator

Many graduates progress into postgraduate health or wellbeing programmes.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration:
 - 4 years with Foundation Year
 - 3 years without Foundation Year
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

MSc Computer Science

The MSc Computer Science programme is designed for graduates and professionals seeking advanced knowledge in computer science theory and application.

This course focuses on algorithms, software development, and advanced computing principles. Students develop strong analytical and programming skills suitable for technical and development-focused roles.

This course is ideal if you:

- Want advanced computer science expertise
- Are interested in software and systems development
- Want a technically focused postgraduate degree
- Are planning careers in development or engineering

Year 1

- Advanced Programming
- Algorithms and Data Structures
- Software Engineering
- Distributed Systems
- Research Methods
- Dissertation or Applied Computer Science Project

Graduates of this programme progress into roles such as:

- Software Developer
- Systems Engineer
- Applications Analyst
- Technical Consultant

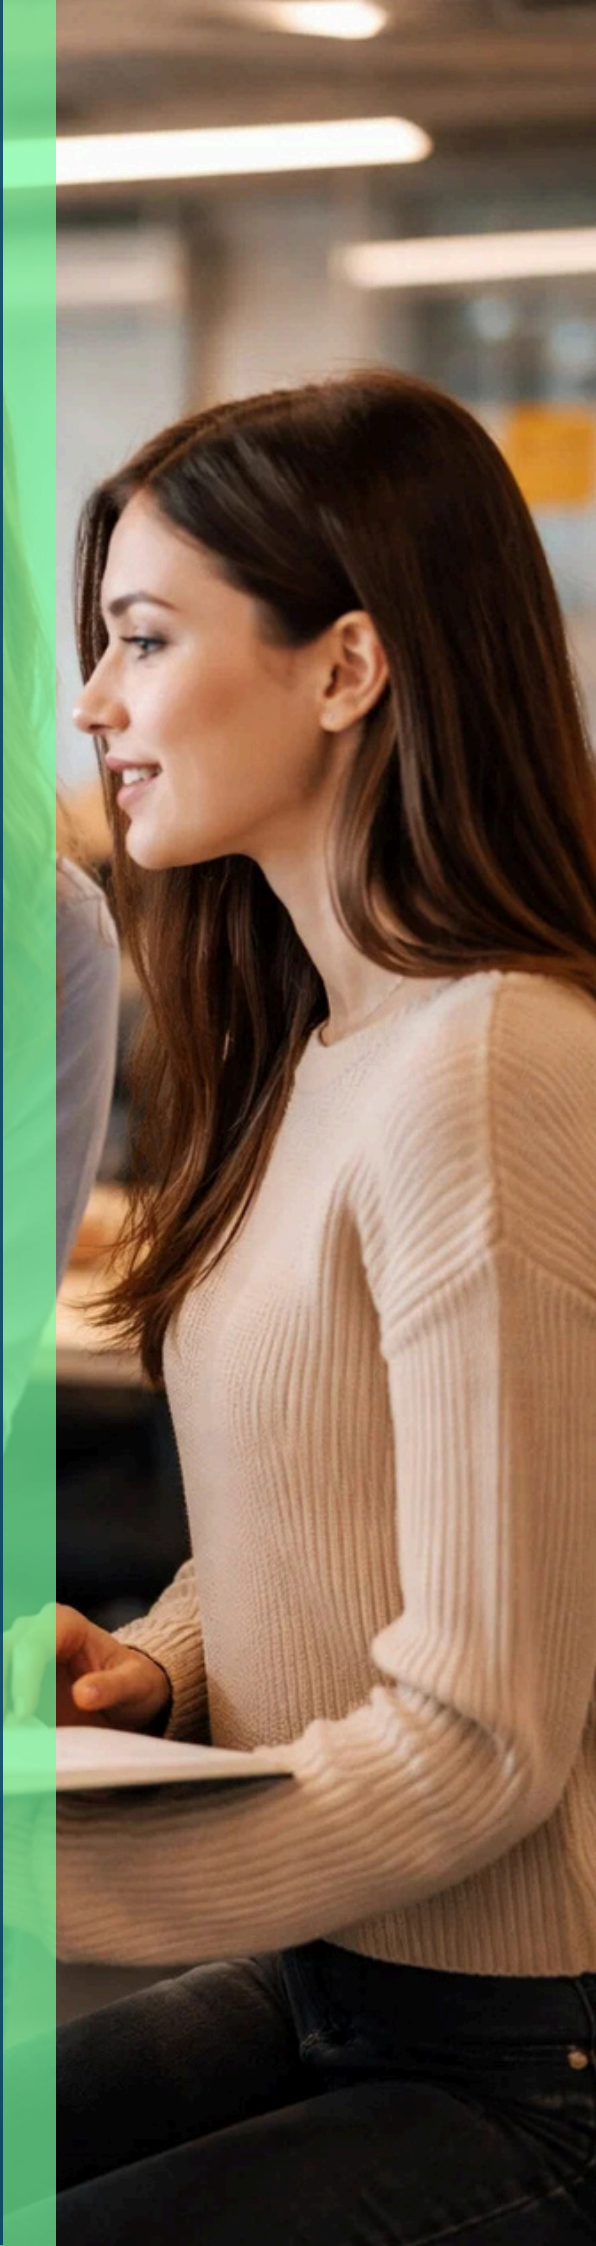

Many graduates progress into senior development or engineering roles.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration: 12–18 months
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

MSc Computer Science and Technology

The MSc Computer Science and Technology programme is designed for graduates who want to combine computer science expertise with applied technology skills.

This course blends advanced computing theory with practical technological application. Students develop skills in software systems, technology integration, and digital problem-solving.

This course is ideal if you:

- Want a balance of theory and applied computing
- Are interested in technology-driven innovation
- Want postgraduate study with practical outcomes
- Are planning careers in technical or hybrid roles

Year 1

- Advanced Software Development
- Systems Integration
- Emerging Technologies
- Data and Technology Management
- Research Methods
- Dissertation or Applied Technology Project

Graduates of this programme progress into roles such as:

- Software or Systems Analyst
- Technology Consultant
- IT Project Specialist
- Digital Solutions Engineer

Many graduates progress into senior technical roles.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration: 12–18 months
- Awarding Institutions: Please refer to page 6
- Locations: Please refer to page 7
- Fees: £9535 per year
- Study Options: Morning | Evening | Weekend

Entry Requirements:

MSc Cyber Security Technology

The MSc Cyber Security Technology programme is designed for graduates seeking advanced technical expertise in cyber security systems and technologies.

This course focuses on hands-on security technologies, secure systems design, and advanced threat mitigation. Students develop strong technical capabilities aligned with cyber security roles.

This course is ideal if you:

- Want a technical cyber security specialism
- Are interested in security tools and technologies
- Want applied postgraduate cyber skills
- Are planning technical cyber security careers

Year 1

- Cyber Security Technologies
- Secure Network Architecture
- Penetration Testing
- Advanced Systems Security
- Research Methods
- Dissertation or Applied Technology Project

Graduates of this programme progress into roles such as:

- Cyber Security Engineer
- Penetration Tester (Junior)
- Network Security Specialist
- Security Technology Consultant

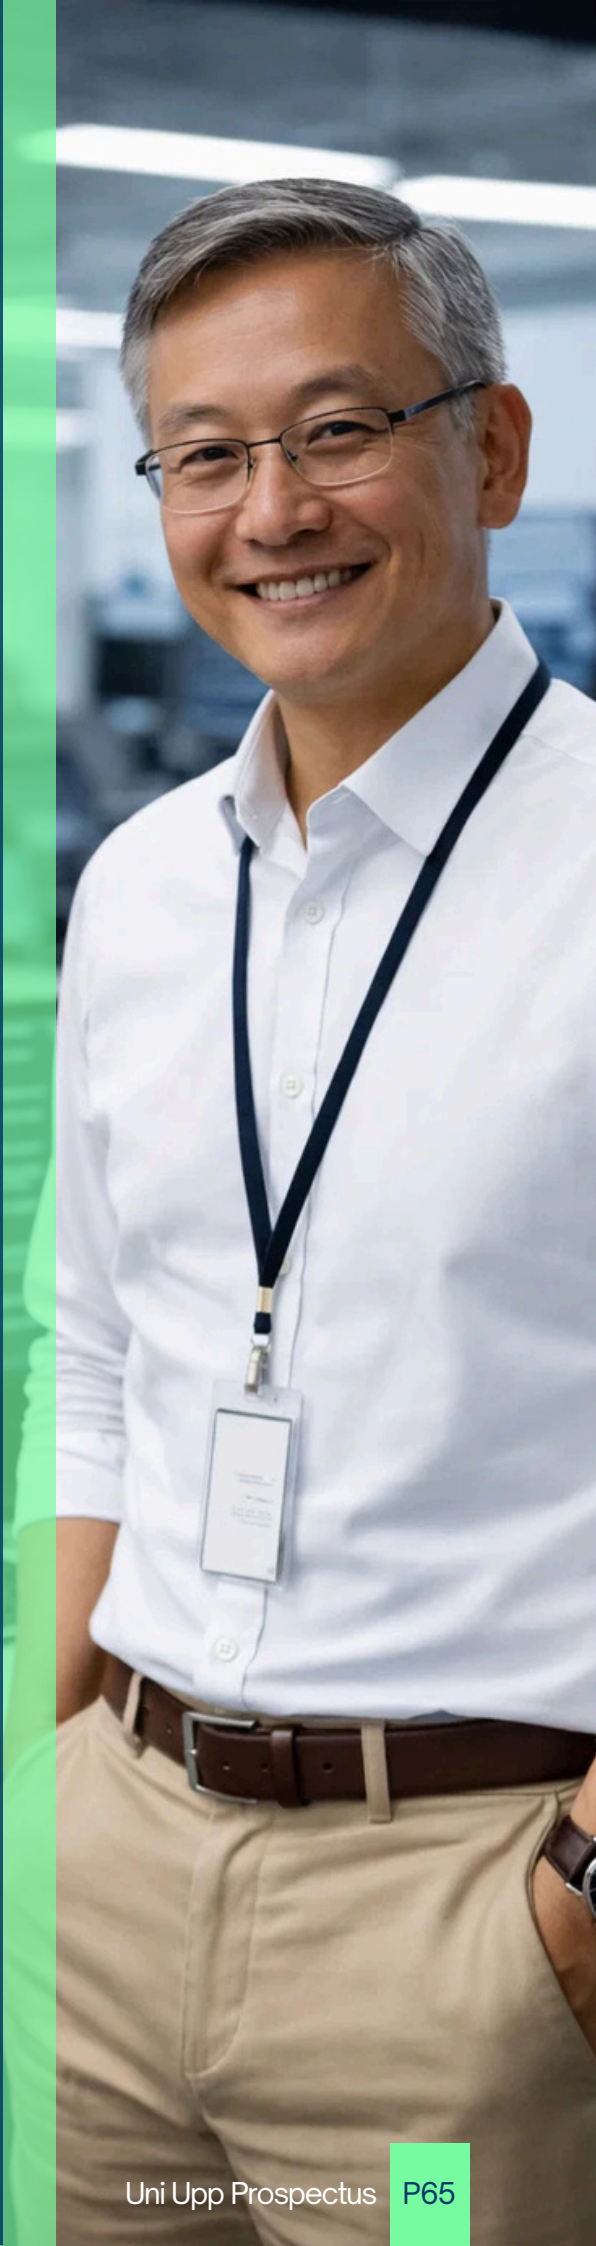

Many graduates progress into advanced technical roles.

Key Information

- Intakes: Jan, Feb, Apr, May, Jun, Sept, Oct, Nov (subject to availability)
- Duration: 12–18 months
- Awarding Institutions: Please refer to page 6
